- 1 Multi-Cavity Design (Great Insulator)
- 2 Reinforced Panels (Structurally Robust)
- 3 Smooth, clean, easy to maintain PVC
- 4 Wood Grain Interiors (Beautiful and maintenance-free)
- 5 Shadow Groove Sash & Frame (No unsightly weld seams)

Multi-Chamber Design

Our multi-chamber design reduces thermal exchange and, with more enclosed air space than other brands, increases insulation values. At lower left, a typical patio door.

Boasting a DP-55 rating, our Patio doors are built to withstand hurricane force winds in excess of 175 m.p.h.

The HGI Door:
More vinyl. More cavities.
More structure. More insulation.

A typical patio door.

The smartest choice. Period.

What makes a Home Guard patio door the smartest choice on the market today? Have a look inside and you'll see that there's much more to these attractive window & door products than what meets the eye! Like the energy efficiency we build into each component—it'll make a world of difference in your home. Our superior design is meticulously executed to maximize insulating properties. Choosing HGI patio doors today means you and your family can keep coming home to savings, comfort—and peace of mind—year after year.

Efficient. Reliable. Guaranteed.

Premium Patio Door Internal Blinds

For the absolute convenience of achieving privacy or partial light, without the hassle of horizontal or vertical blinds, the HGI Premium Patio door internal mini-blind option is the perfect solution. Internal mini-blinds tilt for a multitude of lighting choices, or can be raised or lowered to achieve full light or full privacy.

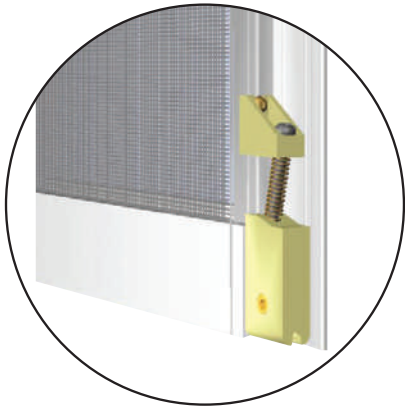

HGI has partnered with ODL, the world leader in between-the-glass mini-blind technology. The ODL mini-blind, available in standard sizes, is the best operating mini-blind available today. HGI also offers an alternate mini-blind for custom size orders.

Note: HGI mini-blind sizes: 6', 9' & 12'. All other sizes will be custom.

Premium Patio Door Screens

A great sliding door deserves a great sliding screen. The Silensia screen system for the HGI Premium Patio Door is designed to move effortlessly and always stay on track. Specially designed and patented adjustable corner rollers on the top and bottom of the screen unit provides trouble-free operation. The screen material is a fiberglass woven mesh that provides bug protection and will not disfigure like aluminum screens.

Available options include HGI's Clearly Better[®] screen, a special screen material that provides additional clarity, and PetScreen[®], a tear-resistant screen material for homes shared with furry friends. Both of these options are available as a special order on all HGI Premium Patio Doors.

Smooth and quiet

These doors slide open smoothly and quietly thanks to:

Patented dual-tandem nylon wheels

A raised rail to protect the wheels from dirt and debris

Perfectly straight and carefully adjusted parts minimize friction

and make for smoother operation

Increased protection

Fixed and mobile panel rails meet and interlock perfectly, making removal from outside almost impossible.

Lower sill design provides safer entry and exit.

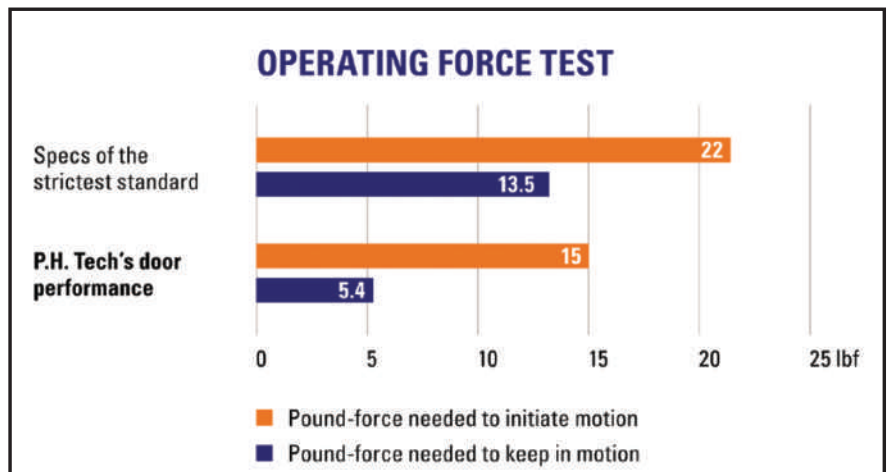

Footlock for added security

Add the optional footlock for increased security, ease of operation and peace of mind.

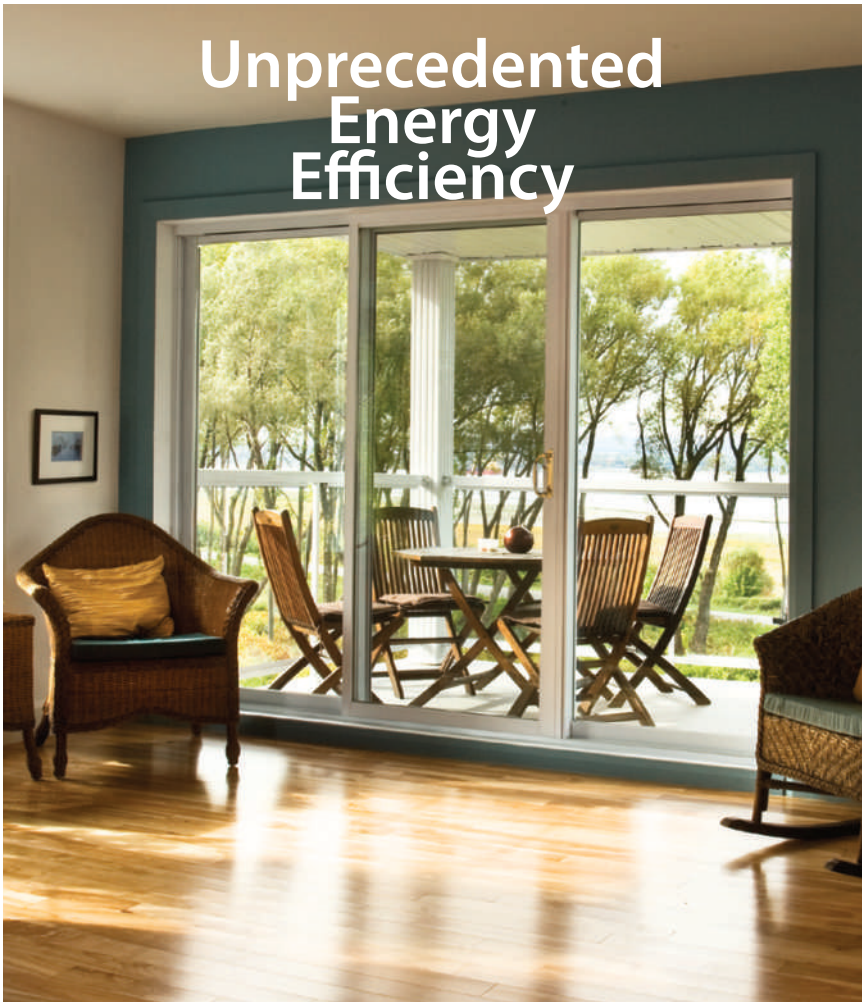

Try the Home Guard fingertip test

Bet you can open this door with just the tip of a finger!
The easiest door to operate in its category.

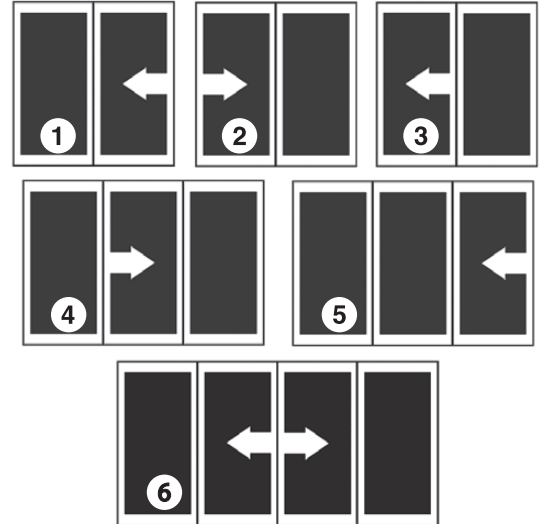

Unprecedented Energy Efficiency

Multiple configurations

This patio door series is available in 2-panel and 3-panel configurations, with a wide range of energy-smart glazing options and decorative grilles. Transoms with PXO bar available.

Available Standard Sizes		
	Order Size	Actual Size
1	5'	58 7/8" X 79 1/2"W
2	6'	70 7/8" X 79 1/2"W
3	8'	94 7/8" X 79 1/2"W
4	9'	105 7/8" X 79 1/2"W
5	9'	102 3/8" X 79 1/2"W
6	12'	138 3/8" X 79 1/2"W

Home Guard PVC Patio Doors are the quietest, most thermally efficient doors on the market today.

Ultra airtight

Say no to drafts with Home Guard patio doors. Built to be ultra airtight, they're among the best in the industry. You can feel the difference: less air changes equal more energy savings.

Multi-chamber design

HGI PVC patio doors are among the most energy-efficient on the market. Our multi-chamber design reduces thermal exchange and, with more enclosed air space than other brands, increases insulation values—without the addition of costly, less recyclable insulating material.

Comfortable to the touch

Vinyl does not conduct and insulates against both heat and cold, so Home Guard patio doors remain comfortable to the touch, and you'll appreciate not having to worry about worrisome condensation or annoying drafts.

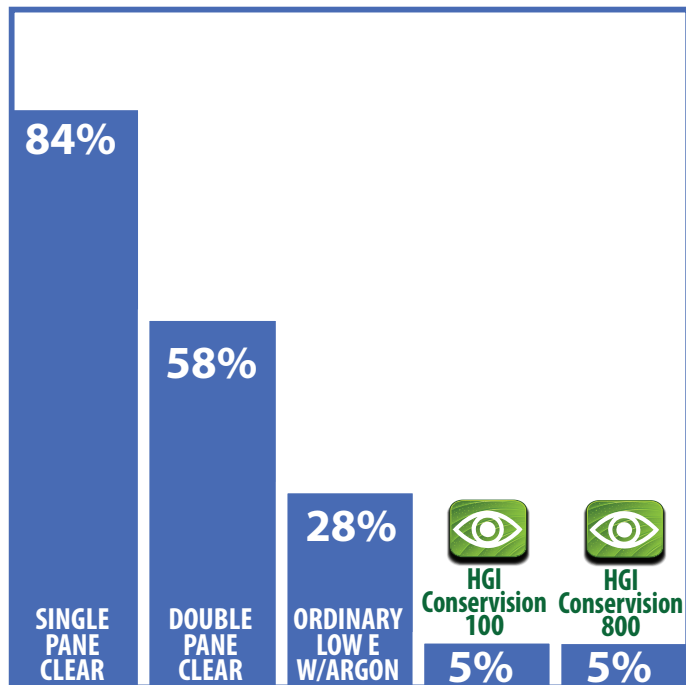

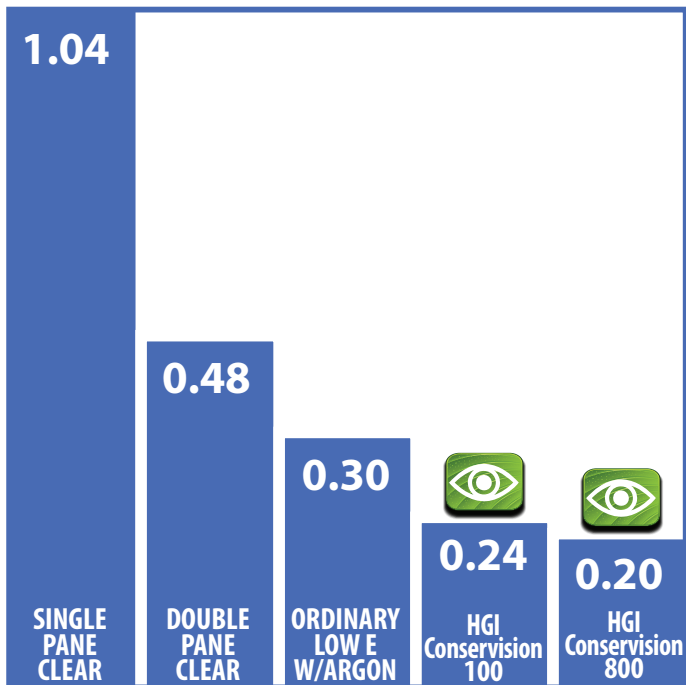

DESIGN PRESSURE: DP55

Just what is Design Pressure?

The DP rating of a window or door is based on laboratory pressure testing in pounds per square foot or psf. Air, water, structural integrity is a three part test that determines much about a patio door's overall performance. A window with a DP55 rating has rated to withstand windspeeds up 150 m.p.h (and is actually tested much higher). This DP rating means that you are purchasing one of the most structurally sound and highest rated patio doors available on the market.

High Performance ConserVision Glass

With glass making up of over 80% of the patio door, HGI uses only the industry's best glass which features the lowest seal failures with outstanding performance for solar heat gain, U-Factors and ultraviolet light resistance. In plain english, the results are this: glass with seals that last, without condensation or drafts, lower cooling costs in summer and lower heating bills in winter, less fading to carpets and furniture.

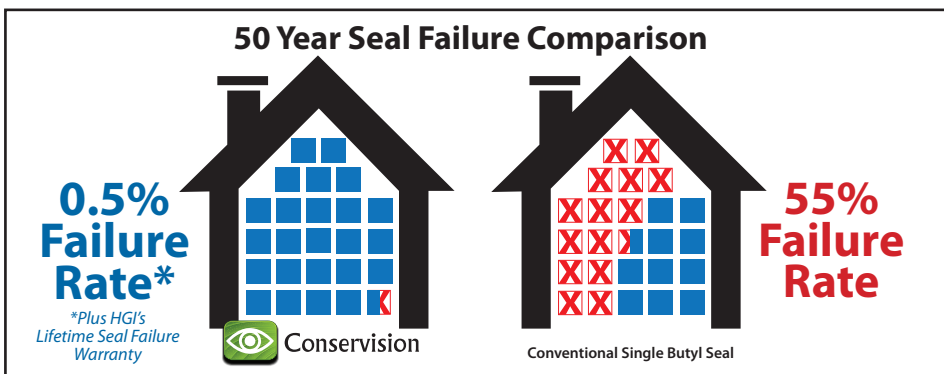

Energy Efficiency of Glass Only

(U-Value: Lower Number = Better Heating/Cooling)

Allowance of UV Rays

(UV rays damage furniture, fabrics and floors)

ConserVision 100

- 1" OA w/ 2 panels double strength
- 95% Plus Argon Filled
- 3 Layers of reflective silver
- Outperforms ordinary Low-e by 25%
- Best longevity in industry (by 900%)

ConserVision 800

- Triple-pane performance in double-pane glass
- 3 Layers of reflective silver
- 2nd pane of glass with special hardcoat of indium tin oxide Low-e
- 18 Layer technology

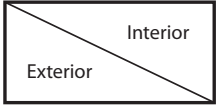

Patio Doors that almost clean themselves.

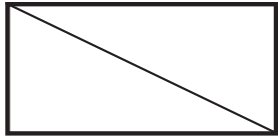

Super smooth Clean/Guard coating will provide you with cleaner, low-maintenance glass. Clean/Guard harnesses the sun's UV rays to loosen dirt so water can rinse it away, leaving windows virtually spotless. Your windows will stay cleaner longer and will clean easier. Enjoy the effects that a little sun, rain and Clean/Guard glass brings to your windows, including better heating/cooling efficiency. Clean/Guard is optional and must be ordered in conjunction with ConserVision glass with energy saving Low-e coating. Clearly, Clean/Guard glass is the choice for your patio doors.
